My uncle, the old Count, says, "Little girls count on their fingers, but big girls count on their legs."

So I did a bit of research for you. Because most of you American women admit that stockings are a sex symbol, you should take better care of them.

I lunched with Lola Edmonds and Nancy Doran, two girls who don't have two worries in the world—that their legs won't attract attention or that they'll ever run out of stockings.

As national representatives for the Deering Milliken manufacturing company, which makes hosiery for you, Lola and Nancy had a great deal of information to pass on.

Lola believes in first-hand demonstration of a product.

When she was demonstrating

a point she pulled her dress way up—whereupon throughout the dining room there was much choking, putting on of glasses and freezing of folks in midair.

Because I am used to this sort of thing, I, of course, leaned over more closely to observe how well she made her point, which is that her Agilon hose clung snugly to her legs all the way up.

Then she took from a bag big enough for a weekend jaunt in Switzerland a tiny pair of hose. "These are what I have on," she said.

As my eyebrows shot up faster than her skirt had, she explained that the hose were made of Agilon nylon that stretches

from the little-girl size into a big-girl-indeed size—and clings.

From the bag came next a pair of the newest thing, the panty hose. If you wear the Oriental slit dress these are ideal. Lunch was over before she could demonstrate.

From Miss Edmonds come these tips for hanging on to your hosiery a bit longer. Always use a hand cream on your hands and feet before putting hose on.

Because nylon fatigues during the day, it is wise to carry an extra pair to avoid that wrinkly look.

Buy your stockings a shade darker than your legs to make slim legs look fuller and full legs look thinner by way of shadows.

Miss Edmonds concludes that if you use the same tender loving care with your stockings that you should give your beast, both will last longer.

**Chapel Further Explains
Resolutions He Sponsors**

BY CHARLES E. CHAPEL
Assemblyman, 46 District

The basic purpose of my Assembly Joint Resolutions is to restore to the states the powers which the states were intended to have under the U. S. Constitution as it is written. The powers of the states have been usurped by the United States Supreme Court rendering decisions which were not merely court decisions but went far beyond court decisions and actually violated the rights of the states and, in effect, enacted legislation which becomes a burden on the people of the United States.

This is absolutely contrary to the founding fathers including Thomas Jefferson, the founder of the Democratic Party and who also was the principal author of the Declaration of Independence.

IN A PREVIOUS issue of the Sacramento Report I stated that three important Assembly Joint Resolutions of which I am the author would be printed in the Assembly Journal for Thursday, April 4th, 1963. This statement was made in good faith but I was fortunate in being able to have

these Assembly Joint Resolutions printed like bills and made available from the Legislative Bill Room. These Assembly Joint Resolutions are designated as AJR 35 by Chapel; AJR 36 by Chapel; and AJR 37 by Chapel. Write to the Legislative Bill Room, Room 215, State Capitol, Sacramento 14, and obtain two free copies of each of these resolutions. As stated previously, many times it will expedite matters if you enclose a self-addressed and stamped envelope.

AT A MEETING of the Assembly Rules Committee on Thursday, April 18, 1963, the committee voted to "Hold in Committee" my AJR 35, asking Congress to call a convention to propose amendments to the U. S. Constitution to overcome the U. S. Supreme Court decision which enables the federal government to reappropriate the Legislatures of the 50 states. In plain words, the committee killed the resolution for all practical purposes.

Therefore, I shall go on the floor of the Assembly at the appropriate time and go through the elaborate parliamentary procedure to attempt to get

enough votes on the floor of the Assembly to get the resolution out of the Rules Committee and bring it on the floor of the Assembly for vote. If I succeed in getting the resolution out of the Rules Committee, I shall then have to have another roll call to pass the resolution to the State Senate. If the State Senate passes it, it goes to the Congress of the United States, without any action by the governor.

THE ASSEMBLY Rules Committee voted to send my AJR 36 and my AJR 37 to the Assembly Committee on Constitutional Amendments because these resolutions definitely pertain to constitutional amendments. My AJR 35 also pertains to constitutional amendments but as stated above the committee did not choose to send it there. The fact that AJR 36 and AJR 37 are to be heard before the Committee on Constitutional Amendments indicates the possibility of getting these through the Legislature and through the U. S. Congress.

FOR THE benefit of anyone who failed to read an earlier column on this subject, AJR 36 asked the U. S. Congress to call a convention to propose an amendment to the U. S. Constitution requesting that the proposed constitutional amendments be submitted to the Legislatures of the 50 states automatically upon application of two-thirds of the Legislatures of a proposal containing identical texts of a proposed amendment.

My AJR 37 petitions Congress to propose, or call a convention to propose, an amendment to the United States Constitution to establish a Court of the Union. This Court of the Union would be composed of the Chief Justices of the State Supreme Courts of the 50 states and would be able to overrule and offset the decisions of the U. S. Supreme Court when such decisions are contrary to the rights of the people and of the states.
